

# Amplifier-separated

# Rectangular-shaped Inductive Proximity Sensor

GX-F/H SERIES

### Rectangular-shaped Inductive Proximity Sensor Amplifier Built-in

# GX-F/H SERIES

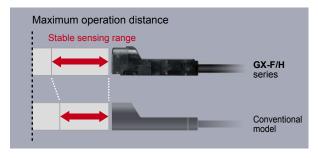

### Industry No. 1\* in stable sensing

\* Based on research conducted by Panasonic Industrial Devices SUNX as of November 2012 among equivalent rectangular inductive sensors.

#### Can be installed with ample space

This sensor has the longest stable sensing range among the same level of rectangular inductive proximity sensors in the industry. It is easy to install the sensor.

	Maximum	Stable sen	sing range	
Туре	operation distance	GX-F/H series	Conventional model	
GX-□6	1.6 mm 0.063 in	0 to 1.3 mm 0.051 in	0 to 1.2 mm 0.047 in	
GX-□8	2.5 mm 0.098 in	0 to 2.1 mm 0.083 in	0 to 1.8 mm 0.709 in	
GX-□12	4.0 mm 0.157 in	0 to 3.3 mm 0.130 in	0 to 3.0 mm 0.118 in	
GX-□15	5.0 mm 0.197 in	0 to 4.2 mm 0.165 in	0 to 4.0 mm 0.157 in	
Long sensing range	8.0 mm 0.315 in	0 to 6.7 mm 0.264 in	0 to 6.4 mm 0.252 in	

<sup>\*</sup> With standard sensing object

#### Variation at the maximum operation distance is within ±8 %

Thorough adjustment and control of sensing sensitivity greatly reduces individual sensor differences and variations.

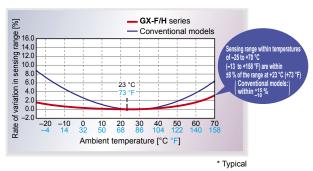

The work of adjusting sensor positions when using multiple sensors and when sensors have been replaced is much easier.

#### Temperature characteristics vary within ±8 %

Components such as the sensor coil and core and product design have been totally revised to provide excellent temperature characteristics.

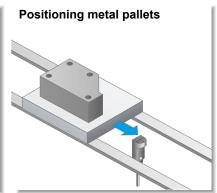

Stable sensing can be obtained regardless of the time of day or the yearly season.

#### **APPLICATIONS**

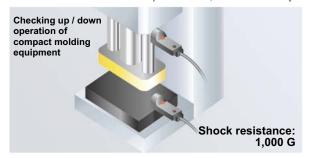

#### **ENVIRONMENTAL RESISTANCE**

#### 10 times the durability! (Compared to conventional models)

The new integrated construction method used provides shock resistance of 10,000 m/s² (approx. 1,000 G in X, Y and Z directions for three times each), and vibration resistance clears durability tests of between 10 and 500 Hz (3 mm 0.118 in double amplitude in X, Y and Z directions for 2 hours each). In addition, resistance to impulse noise is approx. three times greater than for conventional models.

# Highly resistant to water or oil! IP68G\* protective construction

The new integrated construction method used improves environmental resistance performance.

The IP68G prevents damage to the sensor by stopping water and oil getting inside.

\* For details, refer to the "SPECIFICATIONS (p.7~)".

# Sensing presence of metallic objects on a part feeder Vibration resistance: 500 Hz

#### **FUNCTIONS**

#### Indicators are easy to see over a wide field of view

A prism with a wide field of view has been developed. This has greatly improved the visibility of the operation indicators.  $_{\rm GX-H\,\tiny \square}$ 

#### MOUNTING

Tightening strength increased with no damage! (excluding GX-06)

A metal sleeve has been inserted.

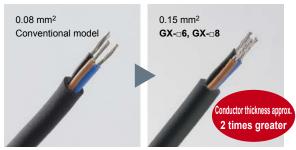

It prevents the sensor from being damaged by tightening too much.

Conductor thickness doubled to make wiring much easier! (GX-\( \bar{\text{GX}}\)-\( \bar{\text{GX}}\) only)

The conductor's thickness was doubled for the  $GX-\Box 6/GX-\Box 8$ . This makes it easier to handle and perform crimping work on the cables. In addition, the tensile strength of the crimping area has become higher.

#### 5 m 16.404 ft cable length type, bending-resistant cable type

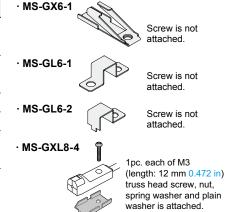

5 m 16.404 ft cable length type (standard: 1 m 3.281 ft) and bending-resistant cable (excluding 5 m 16.404 ft cable length type) are available. However, long sensing range type is not available. When ordering 5 m 16.404 ft cable length type, suffix "-C5" to the model No. When ordering bending-resistant cable type, suffix "-R" to the model No.

(e.g.) 5 m 16.404 ft cable length type of GX-F15AI-P is "GX-F15AI-P-C5". Bending-resistant cable type of GX-F15AI-P is "GX-F15AI-P-R".

Cabl	e extension	Extens	ion up to total 100 m 328.084 ft i	s possible with 0.3 mm <sup>2</sup> , or more	e, cable.			
Net	weight		Front sensing type: 20 g approx.	, Top sensing type: 20 g approx				

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73 °F.
  - 2) " I" in the model No. indicates a different frequency type.
  - 3) The maximum operation distance stands for the maximum distance for which the sensor can detect the standard sensing object. The stable sensing range stands for the sensing range for which the sensor can stably detect the standard sensing object even if there is an ambient temperature drift and/or supply voltage fluctuation.
  - 4) Panasonic Industrial Devices SUNX's IP68 test method
  - ① Immerse at 0 m below 0 °C +32 °F water surface and leave for 30 min. Then, immerse at 0 m below +70 °C +158 °F water surface and leave for 30 min.
  - ② Regard the heat shock test in ① as one cycle and perform 20 cycles.
    ③ Leave in water at a depth of 1 m 3.281 ft in water for 500 hours.

  - After tests ① to ③, insulation resistance, voltage withstandability, current consumption, and sensing ranges must meet the standard values.

    If using the sensor in an environment where cutting oil droplets splatter, the sensor may be deteriorated due to added substances in the oil.
  - Please check the resistivity of the sensor against the cutting oil you are using beforehand.

#### SENSING CHARACTERISTICS (TYPICAL)

#### GX-6 type

#### Sensing field

#### Standard sensing object | Standard sensing object | Iron sheet 12 × 12 × 11 mm | 0.472 × 0.472 × 10.039 in | 0.472 × 10.039 in range L (mm in) Setting distance L (mm ì 3 0.118 2 Sensing 2 0.079 → Right 0.157 -Center-Operating point $\ell$ (mm in)

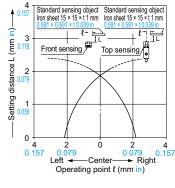

#### Correlation between sensing object size and sensing range

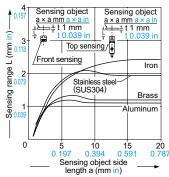

As the sensing object size becomes smaller than the standard size (iron sheet 12 × 12 × t 1 mm  $0.472 \times 0.472 \times t$  0.039 in), the sensing range shortens as shown in the left figure.

#### GX-8 type

#### Sensing field

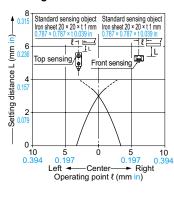

#### Correlation between sensing object size and sensing range

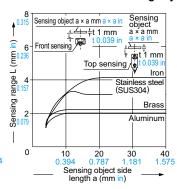

As the sensing object size becomes smaller than the standard size (iron sheet 15 × 15 × t 1 mm  $0.591 \times 0.591 \times t$  0.039 in), the sensing range shortens as shown in the left figure.

#### GX-12 type

#### Sensing field

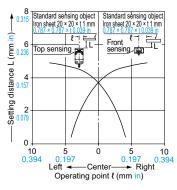

#### Correlation between sensing object size and sensing range

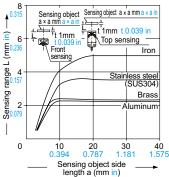

As the sensing object size becomes smaller than the standard size (iron sheet 20 × 20 × t 1 mm  $0.787 \times 0.787 \times t \ 0.039$  in), the sensing range shortens as shown in the left figure.

#### GX-15 type

#### Sensing field

#### Correlation between sensing object size and sensing range

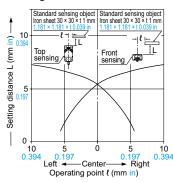

As the sensing object size becomes smaller than the standard size (iron sheet 20 × 20 × t 1 mm  $0.787 \times 0.787 \times t$  0.039 in), the sensing range shortens as shown in the left figure.

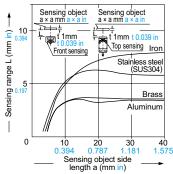

#### SENSING CHARACTERISTICS (TYPICAL)

#### GX-15 (Long sensing range) type

#### Sensing field

#### Correlation between sensing object size and sensing range

As the sensing object size becomes smaller than the standard size (iron sheet  $30 \times 30 \times t$  1 mm  $1.181 \times 1.181 \times t$  0.039 in), the sensing range shortens as shown in the left figure.

#### PRECAUTIONS FOR PROPER USE

 Never use this product as a sensing device for personnel protection.

 In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

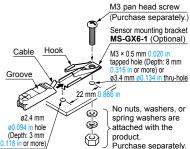

#### **Mounting**

#### GX-6 type

Use the optional sensor mounting bracket when installing.

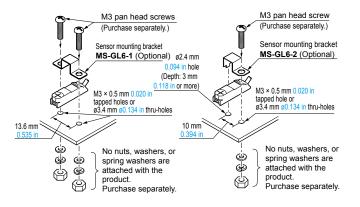

#### <When using MS-GX6-1 (Optional / recommended)>

- To mount the sensor with a nut, the mounting hole diameter should be Ø3.4 mm Ø0.134 in.
- ① Insert the sensor into the bracket as shown on the right.
- ② Push the sensor until the bracket hook is lodged in the groove on the upper portion of the sensor.
- ③ Fix the bracket in place with M3 pan head screw.

#### <When using MS-GL6-1 (Optional) / MS-GL6-2 (Optional)>

• To mount the sensor with a nut, the mounting hole diameter should be Ø3.4 mm Ø0.134 in.

#### GX-8 type

#### <When using MS-GXL8-4 (Optional)>

 Make sure to use a M3 (length: 12 mm 0.472 in or more) truss head screw (accessory for MS-GXL8-4). The tightening torque should be 0.7 N·m or less.
 (Do not use a flat head screw or a pan head screw.

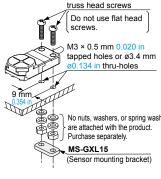

#### GX-12 type

- The tightening torque should be 0.7 N·m or less.
- To mount the sensor with a nut, the mounting hole diameter should be ø3.4 mm ø0.134 in.
  Further, the hole in which the boss is inserted should be ø2.5 mm ø0.098 in and 3 mm 0.118 in, or more, deep.

# M3 (length 12 mm 0.472 in or more) pan head screw (Purchase separately.) M3 × 0.5 mm 0.020 in tapped hole (Depth: 10 mm 0.394 in or more) or ø3.4 mm ø0.134 in thru-hole 16 mm 0.630 in No nuts, washers, or spring washers are attached with the product. Purchase separately. Ø2.5 mm ø0.098 in hole (Depth: 3 mm 0.118 in or more)

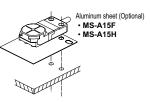

#### GX-15 type

- The tightening torque should be 1 N·m or less.
- To mount the sensor with a nut, the mounting hole diameter should be Ø3.4 mm Ø0.134 in.

M3 pan head screws or

 When installing the long sensing range type on iron or stainless steel plate, put the optional aluminum sheet in between the sensor and the plate.

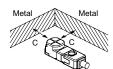

#### PRECAUTIONS FOR PROPER USE

#### Influence of surrounding metal

 When there is a metal near the sensor, keep the minimum separation distance specified below.

#### Front sensing type

	GX-F6 type	GX-F8 type	GX-F12 type	GX-F15 type	GX-FL15 type
Α	6 mm 0.236 in (Note 1)	7.4 mm 0.291 in	7.1 mm 0.280 in	8 mm 0.315 in	8 mm 0.315 in (Note 2)
В	8 mm 0.315 in	8 mm 0.315 in	20 mm 0.787 in	20 mm 0.787 in	30 mm 1.181 in
С	3 mm 0.118 in	3 mm 0.118 in	7 mm 0.276 in	7 mm 0.276 in	10 mm 0.394 in

Notes: 1) When using **MS-GX6-1** (recommended mounting bracket, optional), the distance "A" including the thickness of mounting bracket will be 6.4 mm 0.252 in.

The GXL-FL15 type should be mounted on an insulator. To mount it on an iron or stainless steel, use the enclosed aluminum sheet.

#### Top sensing type

	GX-H6 type	GX-H8 type	GX-H12 type	GX-H15 type	GX-HL15 type
D	3 mm 0.118 in	4 mm 0.157 in	7 mm 0.276 in	6 mm 0.236 in	12 mm 0.472 in
Е	10 mm 0.394 in	10 mm 0.394 in	20 mm 0.787 in		
F	2 mm 0.079 in	3 mm 0.118 in	3 mm 0.118 in	0 mm 0 in	10 mm 0.394 in (Note)
G	2 mm 0.079 in	3 mm 0.118 in	3 mm 0.118 in	3 mm 0.118 in	10 mm 0.394 in

Note: When **GX-HL15** type is mounted on an insulator or seated on the enclosed aluminum sheet, the distance "F" can be zero.

#### **Mutual interference prevention**

 When two or more sensors are installed in parallel or face to face, keep the minimum separation distance specified below to avoid mutual interference.

	Н	J	
GX-F6	Between "I" type and non "I" type	0 mm (Note 2)	15 mm 0.591 in

GX-F8 GX-H8	Between "I" type and non "I" type	0 mm (Note 2)	15 mm 0.591 in
type	Between two "I" types or two non "I" types	20 mm 0.787 in	35 mm 1.378 in
GX-F12 GX-H12	Between "I" type and non "I" type	0 mm (Note 2)	25 mm 0.984 in
type	Between two "I" types or two non "I" types	25 mm 0.984 in	50 mm 1.969 in
GX-F15 GX-H15	Between "I" type and non "I" type	0 mm (Note 2)	25 mm 0.984 in
type	Between two "I" types or two non "I" types	45 mm 1.772 in	70 mm 2.756 in
GX-FL15 GX-HL15	Between "I" type and non "I" type	0 mm (Note 2)	25 mm 0.984 in
type	Between two "I" types or two non "I" types		170 mm 6.693 in

Notes: 1) "I" in the model No. specifies the different frequency type.

2) Close mounting is possible for up to two sensors. When mounting three sensors or more at an equal spacing, align the model with "I" and the model without "I" alternately. The minimum value of dimension "H" should be as given below.

GX-F6/H6 type: 3.5 mm 0.138 in GX-F8/H8 type: 6 mm 0.236 in GX-F12/H12 type: 6.5 mm 0.256 in GX-F15/H15 type: 15 mm 0.591 in GX-F15/HL15 type: 47.5 mm 1.870 in

#### Sensing range

 The sensing range is specified for the standard sensing object. With a non-ferrous metal, the sensing range is obtained by multiplying with the correction coefficient specified below. Further, the sensing range also changes if the sensing object is smaller than the standard sensing object or if the sensing object is plated.

#### Correction coefficient

Mode No Metal	OA-1 0	GX-F8 GX-H8 type	GX-F12 GX-H12 type	GX-F15 GX-H15 type	GX-FL15 type	GX-HL15 type			
Iron	1	1	1	1	1	1			
Stainless stee (SUS304)	0.76 approx.	0.76 approx.	0.79 approx.	0.68 approx.	0.70 approx.	0.76 approx.			
Brass	0.50 approx.	0.50 approx.	0.56 approx.	0.47 approx.	0.45 approx.	0.50 approx.			
Aluminum	0.48 approx.	0.48 approx.	0.53 approx.	0.45 approx.	0.43 approx.	0.48 approx.			

#### Wiring

 The output does not incorporate a short-circuit protection circuit. Do not connect it directly to a power supply or a capacitive load.

#### **Others**

• Do not use during the initial transient time (50 ms) after the power supply is switched on.

#### DIMENSIONS (Unit: mm in)

The CAD data can be downloaded from our website.

15 0.59

29.5 1.161 2.8 7.2 0.110 0.283

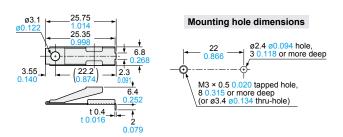

2.8 0.110

#### DIMENSIONS (Unit: mm in)

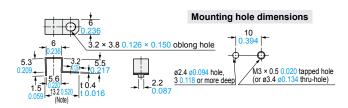

The CAD data can be downloaded from our website.

#### MS-GX6-1 Sensor mounting bracket for GX-6 type (Optional)

Material: Stainless steel (SUS304)

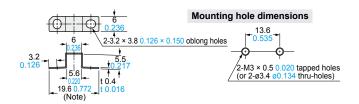

#### MS-GL6-2 Sensor mounting bracket for GX-6 type (Optional)

Material: Stainless steel (SUS301)

Note: 13.4 mm 0.528 in with the sensor fitted.

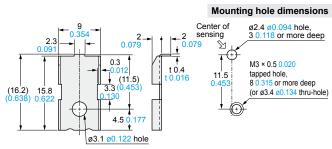

#### MS-GL6-1 Sensor mounting bracket for GX-6 type (Optional)

Material: Stainless steel (SUS301)

Note: 20 mm 0.787 in with the sensor fitted.

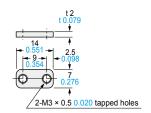

#### MS-GXL8-4 Sensor mounting bracket for GX-8 type (Optional)

Material: Stainless steel (SUS304)

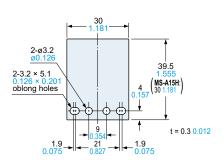

1 pc. each of M3 (length 12 mm 0.472 in) truss head screw, nut, spring washer and plain washer is attached.

#### MS-GXL15 Sensor mounting bracket for GX-15 type (Optional)

Material: Cold rolled carbon steel (SPCC)

#### MS-A15F MS-A15H Aluminum sheet (Optional)
